General overview of the Group

Chairman's message

To the Shareholders,

The Group's performance during the first half of 2007 provided further evidence that we are on track to deliver **profitable growth** thanks to our positioning in buoyant markets and our robust industrial underpinnings.

In Asia, our new facility producing graphite blocks at Chongqing in China has, as expected, moved into the start-up phase. This represents a major asset for our Group because this new plant will ultimately double our isostatic graphite production capacity. The Group's other specialties have also enjoyed success in the region thanks to our high-quality offering and now very extensive manufacturing base. As a result, our sales in Asia advanced by 27% on a like-for-like basis during the first half of the year.

Energy efficiency lies at the heart of Carbone Lorraine's expertise. With its innovative offering, Carbone Lorraine stands out from its rivals in fast-expanding markets, such as equipment for wind turbines. The very rapid development in demand for graphite equipment for solar energy applications is also creating a new and very substantial market for the Group.

Innovation was the driving force behind the foundation of Carbone Lorraine, which filed its first patents for the manufacture of artificial graphite in the late 19th century. It continues to drive the constant adjustments to our offering of products and services to customers' needs, which we keenly anticipate and clearly understand. Our innovative CL Clad® material has enjoyed promising commercial success. It is already helping to strengthen our position in anticorrosion equipment.

Lastly, the first half of 2007 was marked by the successful integration of the **acquisitions** we completed recently. GES, Kapp and Lenoir Elec have all been rapidly integrated into the Carbone Lorraine model and are reaping the benefits of strong growth dynamics.

Our development is now predicated on **four growth drivers**, *i.e.* Asia, innovation, energy efficiency and acquisition-led growth.

It is also underpinned by our positioning in buoyant markets, particularly electronics, renewable energies and more generally energy generation and distribution, fine chemicals and

pharmaceuticals. For each of these markets, specific growth projects have been initiated to provide solutions to the needs of our customers and to reap the full benefit in terms of our growth and earnings.

Previously, Carbone Lorraine had embarked on large-scale restructuring to benefit from a robust and modernized manufacturing base.

These two transformations should help the Group both to withstand any downcycles more effectively and to reap the full benefit of any upcycles.

The current portfolio of expansion projects will generate significant additional sales from 2008 onwards and is set to ramp up progressively over the next four years. Assuming economic conditions remain as they are this year for the entire period, particularly in the main regions, the Group has set itself the following two objectives for 2011, *i.e.* sales of €1 billion in 2011 and a 50% increase in our return on capital employed by the same date

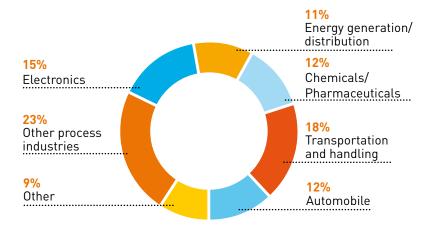

I am more confident than ever in the Group's future on the strength of the proven ability of Carbone Lorraine's teams to move forward and make a success of our strategy of profitable growth.

Claude Cocozza

Overview of the Group's businesses

BREAKDOWN OF SALES BY MARKETS

Advanced Materials and Technologies

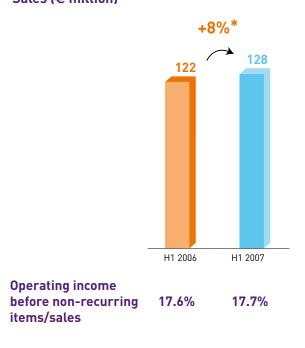

The **Advanced Materials and Technologies** division posted interim 2007 sales of €128 million, up 8% at constant exchange rates compared with the previous year. This sales figure includes the sales posted by Kapp, a company acquired in late 2006. On a like-for-like basis, sales advanced by 5%.

Sales of graphite equipment for high-temperature applications were brisk during the first six months in the ceramic body armor, thermal treatment, plastics manufacturing and aerospace markets. Conversely, sales of brakes declined. Lastly, sales of anticorrosion equipment for chemicals and pharmaceuticals applications also saw a significant increase, especially in Asia. Major orders of noble metal equipment are due to be delivered during the second half of the year.

The operating income before non-recurring items posted by the Advanced Materials and Technologies division came to €22.6 million. It advanced by 5% compared with the previous year, representing 17.7% of sales.

Interim IFRS operating income was temporarily affected by the recognition of start-up costs at companies in China due to be consolidated at year-end 2007. Operating income after non-recurring items thus stood at €19 million, representing 14.9% of sales.

Sales (€ million)

^{*} at constant exchange rates

Electrical Protection

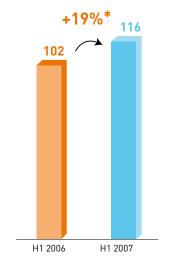

In **Electrical Protection**, interim 2007 sales came to €116 million, up 16% compared with the first half of 2006 on a like-for-like basis and up 19% at constant exchange rates including the sales recorded by Lenoir Elec.

Sales posted a strong increase across all the Group's geographical regions, both in general-purpose fuses and semiconductor protection fuses.

In Europe, the growth in sales was accentuated by the success of coolers for semiconductor protection. It was also driven by moves to strengthen sales and marketing organisations and by the successful start-up of the new range of Modulostar® fuseholders. In North America, sales to the leading distribution networks were particularly brisk.

The Electrical Protection division's operating income before non-recurring items stood at €11.6 million, up 7% compared with the first half of 2006. This figure represented 10% of the Group's sales. After taking into account a capital loss on the sale of land, IFRS operating income came to €10.8 million.

Sales (€ million)

Operating income before non-recurring 10.5% 10% items/sales

Electrical Applications

The sales posted by the **Electrical Applications** division totaled €103 million, representing an increase compared with the first half of 2006 of 6% at constant exchange rates and 3% on a like-for-like basis.

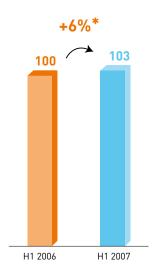

Sales of brushes and equipment for industrial motors advanced across all the Group's geographical regions, owing notably to its effective offering of wind energy solutions.

In automobile markets, growth in brush sales in Asia and the price hikes introduced in late 2006 practically offset the expected decline in North American sales linked to the closure of the Farmville facility in the US.

The operating income before non-recurring items posted by the Electrical Applications division climbed 37% to €11.1 million. This represented 10.8% of sales, an improvement of 2.6 points.

The division's IFRS operating income was on a par with operating income before non-recurring items. The charges announced at the beginning of the year in relation to the closure of the Farmville plant (€2 million during the first half and €2 million expected during the second half) were offset by the prior period income of Indian companies that were consolidated for the first time from January 1, 2007 and by a capital gain on a land sale.

Sales (€ million)

Operating income before non-recurring 8.2% 10.8% items/sales

^{*} at constant exchange rates

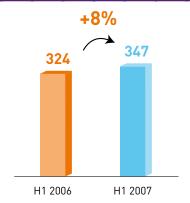

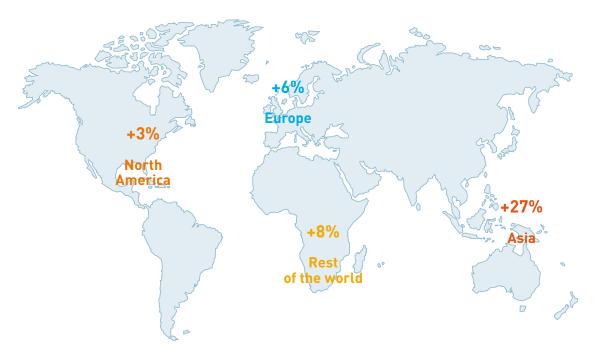

Consolidated sales

The Group's interim 2007 sales came to \leqslant 347 million, up 7% on a reported basis taking into account a negative currency effect of 4%. Sales moved up 11% at constant exchange rates, with organic growth contributing eight points and acquisitions three points of this increase.

The first six months of the year again saw very strong sales growth in Asia (27%*). Sales growth was also brisk in Europe running at 6%* and in North America, where it reached 3%* in spite of the expected reductions in sales of brushes and brushcards to the North American automobile industry. Sales in the rest of world advanced by 8%*.

BREAKDOWN OF SALES GROWTH BY REGION **

^{*} Increases stated on a like-for-like basis.

^{**} On a like-for-like basis compared with the first half of 2006.

Operating income

Operating income before non-recurring items came to €37.5 million, up 12% compared with the year-earlier period.

It was boosted by strong growth in sales volumes during the first six months and by the improvement in the Electrical Applications division's results, since the latter's Farmville plant is currently being restructured. This figure represented 10.8% of the Group's sales.

Operating income was affected only modestly by currency fluctuations because the Group manufactures products in the same regions as it sells them.

The non-recurring items referred to in the presentation of results by segment totaled €4 million, bringing IFRS operating income to €33.5 million compared with €31.8 million during the first half of 2006. The IFRS operating margin came to 9.7%.

Net income attributable to equity holders of the parent

Net finance costs increased to €5.1 million owing primarily to the rise in interest rates.

Net income attributable to equity holders of the parent stood at €19.4 million on a par with the level recorded in the first half of 2006 (€19 million), a figure not affected by non-recurring items arising from the start-up of companies in China and the closure of the Farmville plant.

Net debt

Cash generated by operating activities during the first six months of 2007 after the change in the working capital requirement and tax came to €11.9 million, compared with €15.5 million in the equivalent period of 2006.

The increase in the working capital requirement reflects the general increase in the business volumes and substantial new orders in anticorrosion equipment, due to be delivered in the second half of the year. In addition, inventories of brushes for automobile motors increased temporarily to maintain a high quality of service for customers during the transfer of the production lines from North America.

Capital expenditures came to €24.4 million, down from €34.5 million during the first half of 2006. 2006 investments included the acquisition of Graphite Engineering & Sales. As in 2006, 2007 investments included financing for the major growth projects currently in progress.

At June 30, 2007, debt stood at €182.6 million, up from €154.3 million at year-end 2006 and €175.7 million at the end of the first half of 2006. The net debt/equity ratio reached 57% comparing to 50% at year-end 2006 and 59% at June 30, 2006.

Should the economic conditions that prevailed during the first half of the fiscal year remain unchanged going forward, sales over 2007 as a whole are expected to continue growing at a brisk pace of at least 6-7% on a like-for-like basis. As a result, 2007 is likely to be another good year for Carbone Lorraine.

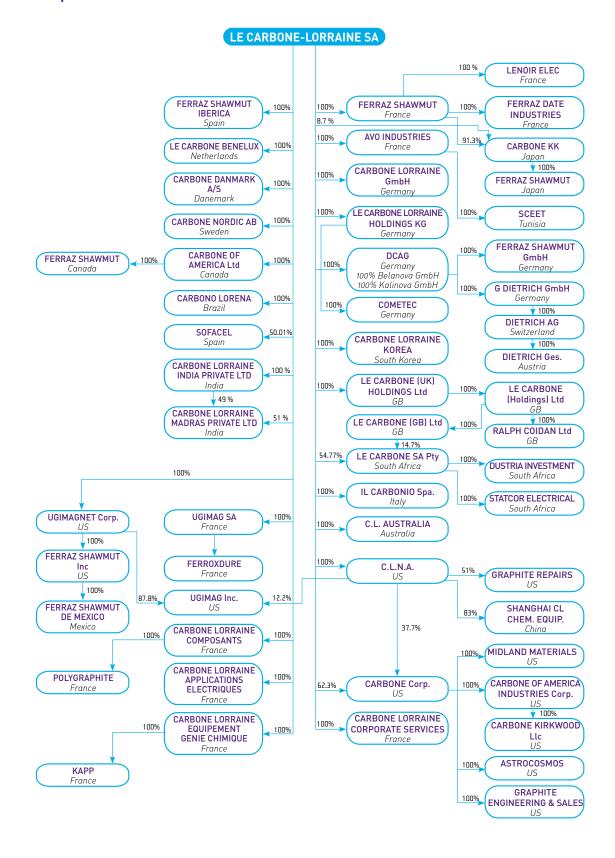

The major expansion projects initiated in recent periods are set to yield their first significant benefits from next year onwards. In particular, this applies to the new graphite block production

facility in China, which is currently about to start production. In 2008, it will provide 2,000 tons in additional capacity, boosting the Group's existing capacity of 5,000 tons p.a., which is not sufficient to meet demand. Assuming business conditions remain equivalent to 2007, a very substantial increase in sales and earnings is anticipated in 2008 and subsequent years.

The fiscal year of all these companies is the same as the calendar year.

Changes in the scope of consolidation over the past three years

The principal changes that affected the consolidated financial statements in 2005, 2006 and 2007 are presented below:

- during fiscal 2005, Carbone Lorraine Composants absorbed Astrad, a brake marketing company that was acquired in the first quarter of 2005;
- during fiscal 2006, the Group acquired US company Graphite Engineering & Sales on February 1, 2006 and French company Kapp in early September 2006 and sold the assets of Astro Service Center during the second half of 2006;
- during fiscal 2007, Ferraz France acquired a majority shareholding in Lenoir Elec during January 2007, while CL India and CL Madras joined the scope of consolidation with effect from January 1, 2007.

Given that these changes were not material, no pro forma accounts were prepared.

Disposal of the Magnets division

The disposal of the Magnets division was presented in the consolidated financial statements for fiscal 2005 in accordance with IFRS 5. The divestment was completed on February 27, 2006.

The balance sheet, income statement and cash flow statement at June 30, 2006 and December 31, 2006 show the assets and liabilities held for sale and discontinued operations on a separate line.

In 2006, the principal movements were as follows:

- an issue of shares deriving from:
 - the exercise of stock options granted to employees, leading to the issue of 79,629 shares for €2.3 million (increase of €0.1 million in the share capital and an issue premium of €2.2 million),
 - the issue of 44,494 shares arising from the capital increase reserved for employees, leading to an impact of €1.5 million (increase of €0.1 million in the share capital and an issue premium of €1.4 million);
- transfer to equity of the 7,851 treasury shares held with a negative impact of €0.4 million;
- an increase of €0.4 million in the fair value of derivatives at the balance sheet date.

In 2007, the principal movements were as follows:

- an issue of shares deriving from the exercise of stock options granted to employees, leading to the issue of 187,105 shares for €6.6 million (increase of €0.4 million in the share capital and an issue premium of €6.2 million);
- the reinstatement of 14,109 shares with an impact of €0.5 million reflecting the decrease in the number of shares held in treasury;
- an increase of €0.5 million in the fair value of derivatives at the balance sheet date.

Note 1 Statement of conformity

In accordance with EC regulation no. 1606/2002 of July 19, 2002, which applies to the consolidated financial statements of European companies listed on a regulated market, the consolidated financial statements of Carbone Lorraine and its subsidiaries (hereinafter "the Group") have been prepared in accordance with IFRS (International Financial Reporting Standards), because the Group is listed in a European Union member state.

The mandatory standards and interpretations at January 1, 2007 did not have any impact on the interim consolidated financial

The options adopted by the Group are stated in the following chapters.

The summary interim consolidated financial statements have been prepared in accordance with IAS 34 - Interim financial reporting. They do not include all the information required for complete annual financial statements and should be read together with the Group's financial statements for the fiscal year ended on December 31, 2006, which may be downloaded from www.carbonelorraine.com

The summary consolidated interim financial statements at June 30, 2007 have been prepared using the recognition and measurement principles stated in the IFRSs adopted in the European Union at the same date. They have also been prepared in line with the presentation and financial reporting rules applicable to annual financial statements, as defined in the general regulations of the Autorité des marchés financiers (AMF, the French market regulator).

The summary interim consolidated financial statements at June 30, 2007 include for comparative purposes figures for the periods ended June 30, 2006 and December 31, 2006 restated using the same rules.

The accounting principles described in Note 2 et seq. have been applied to prepare comparative information and the summary interim consolidated financial statements at June 30, 2007.

Accounting policies and principles of consolidation

A - Basis of consolidation

The consolidated financial statements include those of the parent company and of all those companies in which the Group holds a controlling interest at December 31 each year. Control is defined as the power to govern the financial and operating policies of a business so as to obtain benefits from its activities. Subsidiaries over which the Group directly or indirectly exerts exclusive control are fully consolidated.

Jointly controlled companies are consolidated proportionately.

The results of subsidiaries acquired or disposed of during the period are included in the consolidated income statement from the acquisition date or up to the disposal date respectively.

All associate undertakings over which the Group exerts significant influence, which is presumed to exist when the latter holds at least 20% of voting rights, are accounted for under the equity method. Subsidiaries' financial statements have been adjusted where necessary to ensure consistency with the policies used by all Group entities within the scope of consolidation.

All material intra-group transactions and balances have been eliminated.

The consolidated financial statements have been prepared in euros.

B - Presentation of the financial statements

Groupe Carbone Lorraine prepares its financial statements in line with the accounting principles laid down in IAS 1 Presentation of financial statements.

B1. Income statement

Given customary practice and the nature of its business activities, the Group has opted for the by function of expense format of the income statement, which consists in classifying costs according to their function under cost of sales, selling, administrative, research and development costs.

R2 Ralance sheet

Assets and liabilities arising during the operating cycle and those with a maturity of less than 12 months at the balance sheet date are classified as current. All other assets and liabilities are classified as non-current.

B3. Consolidated statement of cash flows

The Group prepares the consolidated statement of cash flows using the indirect method and as stipulated in IAS 7.

The indirect method consists in determining cash flows from operating activities for which net income or loss is adjusted for the effects of non-cash transactions and items arising from investing or financing activities.

B4. Operations, assets and liabilities held for sale

In accordance with IFRS 5, assets and liabilities that are immediately available for sale in their current state and the sale of which is highly probable are shown on the balance sheet under assets and liabilities held for sale. Where a group of assets $\,$ is held for sale in a single transaction, the group of assets and corresponding liabilities is considered as a whole. The disposal must take place in the year following this presentation of the asset or group of assets.

The assets or group of assets held for sale are stated at the lower of their carrying amount and fair value net of disposal costs. Non-current assets appearing on the balance sheet as held for sale are no longer depreciated once they are presented as such.

The income of disposal groups is shown by separating the net income of continuing operations, and their cash flows are presented on a separate line of the statement of cash flows.

C - Foreign currency translation

The financial statements of the Group's foreign subsidiaries are prepared in their functional currency.

The balance sheet of companies whose functional currency is not the euro is translated into euros at the closing rate, except for equity, which is translated at the historic exchange rate. Income statement items are translated at the average exchange rate for the period.

Cash flow statement items are translated at the average exchange rate, except for cash, which is translated at the closing

Translation differences arising on balance sheet items are recorded separately in equity under cumulative translation adjustments. They comprise:

- the impact of changes in exchange rates on balance sheet
- the difference between net income calculated at the average exchange rate and net income calculated at the closing

Goodwill and fair value adjustments deriving from the acquisition of subsidiaries whose functional currency is not the euro are treated as the relevant subsidiary's assets and liabilities. They are therefore stated in the subsidiary's functional currency and translated at the closing rate.

D - Foreign currency assets and liabilities

Foreign currency transactions are recognized and measured in line with IAS 21 - Effects of changes in foreign exchange rates.

Transactions denominated in currencies other than the euro are translated at the exchange rate ruling at the transaction date. At the end of the fiscal year, monetary assets and liabilities denominated in foreign currencies are translated at the closing

rate. Any gains and losses arising from currency translation are taken to operating income for the period under foreign exchange gains and losses.

Translation gains and losses on financial instruments denominated in foreign currencies representing a hedge of a net investment in a foreign operation are recorded in equity under cumulative translation adjustments. The accounting treatment for foreign currency gains and losses at the transition date is described in Section C above.

E - Hedging

Hedging transactions are recognized and measured in line with the principles laid down in IAS 32 and 39.

E1. Currency and commodity hedges

A currency derivative is eligible for hedge accounting where the hedging relationship was documented at the outset and its effectiveness has been demonstrated throughout its life.

A hedge is a way of protecting against fluctuations in the value of assets, liabilities and irrevocable commitments. A hedge also helps to protect against adverse fluctuations in cash flows (sales generated by the assets of the business, for instance).

Derivative instruments are stated at their fair value. Changes in the fair value of these instruments are accounted for as follows:

- changes in the fair value of instruments eligible as future cash flow hedges are accounted for directly in equity in respect of the effective portion of the hedge (intrinsic value). Changes in the fair value of these instruments are then taken to operating income and offset fluctuations in the value of the assets, liabilities and irrevocable commitments that are hedged as they occur. The ineffective portion of the hedge (time value) is taken to operating income;
- changes in the fair value of instruments not eligible as cash flow hedges are taken directly to income.

E2. Interest rate hedging

Interest rate derivatives are stated at fair value on the balance sheet. Changes in their fair value are accounted for as

- the ineffective portion of the derivative instrument is taken to income under the cost of debt;
- the effective portion of the derivative instrument is recognized as follows:
 - in equity for a derivative accounted for as a cash flow hedge (e.g. a swap turning a debt carrying a floating interest rate into a fixed-rate liability),
 - in income (cost of debt) in the case of a derivative accounted for as a fair value hedge (e.g. a swap turning a fixed interest rate into a floating interest rate). This accounting treatment is offset by changes in the fair value of the hedged debt.

F - Intangible assets

The applicable standards are IAS 38 - Intangible assets, IAS 36 - Impairment of assets and IFRS 3 - Business combinations.

In accordance with IAS 38 - Intangible assets, only items in respect of which future economic benefits are likely to flow to the Group and the cost of which may be reliably determined are accounted for as intangible assets.

The Group's intangible assets comprise primarily goodwill.

F1. Goodwill

In accordance with IFRS 3, the subsidiary's assets, liabilities and contingent liabilities are stated at fair value at the acquisition date following a business combination. Minority interests are stated at their share of the fair value of assets, liabilities and contingent liabilities recognized. The difference between the acquisition cost of the subsidiary and the Group's share of its net assets stated at fair value is accounted for under goodwill.

The fair value of assets and liabilities and the calculation of goodwill is finalized within 12 months of the acquisition date.

Goodwill is allocated individually to the Group's cash generating units (CGUs). The Group adopted the following four CGUs at June 30, 2007:

- Electrical Applications;
- Electrical Protection;
- High-temperature applications and high-energy braking;
- Anticorrosion equipment.

In accordance with IFRS 3 - Business combinations, goodwill is not amortized. It undergoes an impairment test once evidence of impairment in the value of assets appears and at least once every year.

In accordance with IAS 36, the Group tests for impairment by:

- preparing normalized cash flow projections after tax based on the Strategic Plan of the relevant CGU;
- determining a value in use using a method comparable to any business valuation by discounting cash flows at the segment's weighted average cost of capital (WACC);
- and comparing this value in use with the carrying amount of the relevant assets to determine whether or not an impairment loss needs to be recognized.

Value in use is determined based on free cash flow projections discounted over a period of five years and a terminal value. The discount rate used for these calculations is the weighted average cost of capital for each of the cash generating units (see Note 5).

The assumptions made for sales growth and terminal values are reasonable and consistent with the market data available for each of the operating activities.

Goodwill impairment losses are irreversible.

F2. Patents and licenses

Patents and licenses are amortized on a straight line basis over the period for which they are protected by law.

Software is amortized on a straight line basis over its probable service life, which may not exceed five years.

F3. Development costs

Under IAS 38 - Intangible assets, development costs are capitalized where:

- the entity has the intent and the financial and technical ability to see the development project through to completion;
- it is probable that the expected future economic benefits that are attributable to the development will flow to the entity;
- and the cost of the asset can be measured reliably.

Research and development costs that do not meet the aforementioned criteria are expensed as incurred. Capitalized development costs meeting the criteria laid down in the new accounting standards are recognized as an asset on the balance sheet. They are amortized on a straight line basis over their useful life, which does not generally exceed three years.

G - Property, plant and equipment

In accordance with IAS 16 - Property, plant and equipment, only items whose cost may be determined reliably and in respect of which future economic benefits are likely to flow to the Group are accounted for as property, plant and equipment.

Property, plant and equipment is stated at historical cost less accumulated depreciation and any impairment losses, except for land, which was revalued at the IFRS transition date.

Depreciation is calculated based on the rate of consumption of the expected economic benefits per item based on acquisition cost, less, where appropriate, residual value, where the latter is deemed to be significant.

The various components of an item of property, plant and equipment are recognized separately where their estimated service life and thus their depreciation period are materially different.

The Group applies the straight-line method of depreciation according to the expected service life of the item.

The periods used are as follows:

buildings: 20 to 50 years;

• fixtures and fittings: 10 to 15 years;

• plant and equipment: 3 to 10 years;

vehicles: 3 to 5 years.

These depreciation periods are reviewed and adjusted in the event of significant changes. These changes are applied prospectively.

Investment grants are recognized at the outset as a deduction from the gross value of the non-current asset.

H - Leases

Under IAS 17, a lease is classified as a finance lease if it transfers substantially to the lessee all the risks and rewards incidental to ownership of an asset.

Where the criteria laid down in the standard are not met, the costs resulting from agreements are charged to income for the period and the lease is considered as an operating lease.

Non-current assets used under a finance lease give rise to the recognition on the balance sheet of both an item of property, plant and equipment and an obligation to make future lease payments. At the commencement of the lease term, the asset and relevant liability of the same value corresponding to the future payments under the lease are recognized on the balance sheet.

Lease payments are broken down into a finance charge and the repayment of the outstanding debt. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

The capitalized asset is depreciated over the useful life adopted by the Group for non-current assets of the same type.

In addition, a portion of the capital amount of the debt is repaid in accordance with the debt repayment schedule contained in the finance lease agreement.

I - Impairment of property, plant and equipment and intangible assets

In accordance with IAS 36 - Impairment of assets, when events or changes in the market environment indicate a risk of impairment, the Group's intangible assets and property, plant and equipment undergo a detailed review to determine whether their carrying amount is below their recoverable amount. This amount is defined as the higher of fair value and value in use.

Should the recoverable amount of assets fall below their carrying amount, an impairment loss is recognized in respect of the difference between these two amounts. Impairment losses recognized on property, plant and equipment and intangible assets (except for goodwill) with a defined useful life may be reversed subsequently if the recoverable amount becomes higher than the carrying amount again (without exceeding impairment loss initially recognized).

The recoverable amount of assets is usually determined based on their value in use. Value in use is defined as the expected future economic benefits from their use and from their sale. It is assessed notably by reference to the discounted future cash flows projected based on economic assumptions and operating budgets drawn up by Carbone Lorraine's senior management.

IAS 36 defines the discount rate to be used as the pre-tax interest rate reflecting the current assessment of time value per market and the risks specific to the asset. It represents the return that investors would require if they had to choose an investment, the amount, maturity and risks of which are equivalent to those of the relevant asset or Cash-Generating Unit (CGU).

The discount rate used for impairment test purposes takes into account the financial structure and gearing of companies in the sector, i.e. of peers and not of the business or group to which the asset or CGU belongs.

J - Financial assets and liabilities

Financial assets and liabilities are measured and recognized in line with IAS 39 - Financial instruments: Recognition and Measurement and by IAS 32 - Financial Instruments: Disclosure and Presentation.

Financial assets comprise investments available for sale, investments held to maturity, transition assets, margin deposits paid in relation to derivative instruments, derivative instruments held as assets, loans, receivables, and cash and cash equivalents.

Financial liabilities comprise borrowings, other financing and bank overdrafts, derivative instruments held as liabilities, margin deposits received in relation to derivative instruments and other liabilities.

Borrowings and other financial liabilities are stated at amortized cost using the effective interest rate (EIR). For example, lending fees are deducted from the initial amount of the debt, then added back period by period according to the calculation of the EIR, with the amounts added back being recognized in income.

K - Treasury shares

Treasury shares are deducted from equity at their acquisition cost. Any gains or losses from the sale of these shares are recognized directly in equity and are not taken to income for the period.

L - Non-current financial assets

Investments in unconsolidated subsidiaries are financial assets classified in the "available for sale" category. They are stated at cost.

Where there is objective evidence of impairment (financial difficulties, deterioration in performance without any growth prospects, local economic situation, etc.), any significant and long-term impairment losses are recognized in income.

These impairment losses are irreversible and are not written

The principal activity of the unconsolidated subsidiaries is the distribution of products manufactured by the Group's consolidated companies.

Subsidiaries that considered alone and on an aggregate basis are not material are not included in the scope of consolidation.

A company is included in the scope of consolidation when two of the following four criteria are met for two consecutive years:

• Equity: the difference between the value of the securities and net equity exceeds 1% of the Group's equity in the previous

- **Debt:** the amount of non-Group debt exceeds €5 million;
- Sales to third parties: the entity's sales less intra-Group sales represent more than 1% of Group sales in the previous vear:
- Net income: net income exceeds €0.5 million.

The materiality of unconsolidated subsidiaries is reassessed at the end of each period.

M - Provisions

In accordance with IAS 37 - Provisions, contingent liabilities and contingent assets, provisions are recorded when the Group is under an obligation to a third party at the end of the fiscal year that is likely or certain to trigger an outflow of resources to the third party, without any equivalent benefit being anticipated by the Group.

The relevant obligation may be legal, regulatory, or contractual in nature. It may also derive from the Group's business practices or from its public commitments where the Group has created a legitimate expectation among such third parties that it will assume certain responsibilities.

The estimated amount shown in provisions represents the outflow of resources that the Group will have to incur to extinguish its obligation. Where this amount cannot be measured reliably, no provision is recorded. In this instance, information is disclosed in the notes to the financial statements.

Contingent liabilities consist of a possible obligation arising from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity or a probable obligation for which the outflow of resources is not likely. They are disclosed in the notes to the financial statements.

With restructurings, an obligation exists where the restructuring has been announced and a detailed plan drawn up or execution of the plan has commenced prior to the balance sheet date.

Where the entity has a reliable schedule, the liabilities are discounted where discounting has a material effect.

N - Inventories

Inventories are carried at the lower of cost and their probable net realizable value.

Cost comprises acquisition or production cost.

The only indirect costs taken into account in the measurement of work in progress and finished goods are production-related expenses. No interest costs are capitalized.

O - Consolidated sales

Net sales includes sales of finished goods and related services, sales of scrap, sales of goods purchased for resale and invoiced shipping costs.

A product is recognized in sales when the entity transfers to the buyer the risks and benefits of ownership of the goods.

A sale is measured at the fair value of the consideration received or receivable. Where payment is deferred, leading to a significant impact on determination of fair value, this is reflected by discounting future payments.

The amount of revenue from the sale of goods and equipment is usually recognized when there is a formal agreement with the customer stipulating that risks have been transferred, the amount of revenue can be measured reliably and it is likely that the economic benefits arising from the transaction will flow to the Group. With agreements providing for formal acceptance of the goods, equipment or services received by the customer, recognition of the revenue is normally deferred until the date of acceptance.

Income from ancillary activities is recorded under the appropriate heading of the income statement, i.e. other revenues, financial income, or as a deduction from (selling, general, administrative or research) expenses of the same type.

P - Employee benefits

Under defined contribution plans, the Group is under no obligation other than to pay contributions. The corresponding charge, which reflects the payment of contributions, is expensed as incurred.

In line with IAS 19, defined benefit pension plans undergo an actuarial valuation using the projected unit credit method. This method sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation. This final obligation is then discounted to present value.

These actuarial calculations are based on various estimates:

- mortality tables;
- retirement dates;
- the rate of future salary and benefit increases and employee turnover:
- the expected rate of return on plan assets;
- discount and inflation rates set for each of the relevant entities taking into account their local macro-economic environment.

Actuarial gains and losses comprise the cumulative impact

- experience adjustments (difference between previous) actuarial assumptions and what has actually occurred);
- changes in actuarial assumptions.

IAS 19 states that actuarial gains and losses may offset one another in the long term. As a result, it provides for the socalled corridor approach for the recognition of post-employment benefit obligations.

The Group has opted to use this method:

- cumulative unrecognized actuarial gains and losses falling outside a corridor of plus or minus 10% of the value of the higher of the plan's assets and obligations are recognized and amortized over the expected average remaining working lives of the employees participating in the plan;
- gains and losses falling within the 10% corridor are not recognized;
- unrecognized net cumulative actuarial gains and losses include both the cumulative portion of the 10% within the corridor, as well as the portion outside the corridor, which has not been recognized at the balance sheet date. In accordance with IAS 19, they are disclosed in the notes to the financial statements.

P1. Recognition of post-employment benefit obligations

The Group's post-employment benefit obligations are accounted for as follows:

On the face of the balance sheet

The amount recognized under liabilities in respect of defined contributions is equal to the total of:

- the present value of defined benefit obligations at the balance sheet date:
- less the fair value at the balance sheet date of plan assets used directly to pay or finance the obligations;
- plus unrecognized actuarial gains (or less unrecognized actuarial losses) that exist under the aforementioned rule;
- less as yet unrecognized past service cost and payments.

On the face of the income statement

The amount expensed or recognized in income (net periodic cost of employee benefits) is the total amount net of the following

- current service cost incurred during the period (or the rights vested during the period);
- interest cost (also called the "discounting effect");
- expected return on plan assets: this expected rate of return is determined based on market expectations at the beginning of the period for returns on plan assets over the entire duration of the corresponding liability (long term);
- actuarial gains and losses: portion recognized during the period;
- past service cost: portion recognized during the period;
- losses/(gains) on any curtailment or settlement of the plan.

P2. Recognition of unrecognized past service costs

Unrecognized past benefits are recognized in income on a pro rata basis with the corresponding obligation.

Q - Non-recurring income and expense

Non-recurring items correspond to income and expense not arising during the Group's day-to-day operations. They are characterized in general by their unusual nature and their material amount.

Non-recurring income and expense include the following

- disposal gains: on property, plant and equipment, intangible assets, investments, other financial assets and other
- impairment losses recognized on investments, loans, goodwill and other assets:
- certain types of provision;
- reorganization and restructuring costs.

R - Operating income

Operating income is shown before net finance costs, taxes and minority interest.

Investment grants are shown as a deduction from costs to which the grant relates.

5 - Deferred tax

Accounting restatements or consolidation adjustments may affect the results of the consolidated companies. Temporary differences are differences between the carrying amount of an asset or liability on the balance sheet and its tax base, which give rise to the calculation of deferred taxes.

In accordance with IAS 12, the Group discloses deferred taxes on the consolidated balance sheet separately from other assets and liabilities. Deferred tax assets are recognized on the balance sheet where it is more likely than unlikely that they will be recovered in subsequent years. Deferred tax assets and liabilities are not discounted.

When assessing the Group's ability to recover these assets, the following items in particular are taken into consideration:

- projections of its future taxable income;
- its taxable income in previous years.

Deferred tax assets and liabilities are stated using the liability method for the balance sheet, i.e. using the tax rate that is expected to be applied in the year in which the asset will be realized or the liability settled, based on tax rates (and tax laws) adopted or virtually adopted at the balance sheet date, taking into account future tax rate increases or decreases.

The measurement of deferred tax assets and liabilities reflects the tax consequences of the way in which the entity expects at the balance sheet date to recover or to settle the carrying amount of its assets and liabilities.

T - Segment reporting

In accordance with the requirements of IAS 14, the Group has opted to use business segments as its primary segment and geographical area as its secondary segment in view of its internal management and reporting structure. The Group is currently organized into three operational businesses:

- Advanced Materials and Technologies: applications of graphite for high-temperature industrial processes, anticorrosion equipment and high-energy braking;
- Electrical Applications: brushes and sliding electrical contacts for industrial, automotive and small household appliance motors and diagnostic analysis of malfunctions in industrial and automotive electric motors in the contact between the brushes and the collector;
- Electrical Protection: fuses and fuseholders protecting industrial equipment and power semiconductors, to ensure the safety of people and equipment.

The Group has divided its secondary reporting segment into five geographical segments: France, Rest of Europe, North America, Asia and the rest of the world.

The Group's segment reporting is prepared in accordance with the accounting methods used to draw up and present the consolidated financial statements.

U - Earnings per share

Basic and diluted earnings per share are shown both for total net income and net income from continuing operations.

Basic earnings per share are calculated by dividing net income for the period attributable to holders of ordinary shares by the weighted average number of ordinary shares in issue during the period.

For the calculation of diluted earnings per share, net income attributable to holders of ordinary shares and the weighted average number of shares outstanding are adjusted for the effects of all dilutive potential ordinary shares.

V - Equity-linked benefits granted to employees

In accordance with IFRS 2 - Share-based payment, stock purchase and subscription options and offerings reserved for employees related to shares in the Group are recognized at fair value at the grant date.

The value of stock purchase and subscription options depends notably on the exercise price, the probability of the conditions attached to exercise of the options being met, the life of the options, current price of the underlying shares, anticipated volatility of the share price, expected dividends and risk-free interest rate over the life of the option. This value is recognized in staff costs on a straight-line basis between the grant date and exercise date with a direct equivalent entry in equity for plans settled in equity and in liabilities to employees for plans settled in cash.

W - Use of estimates

For the preparation of the consolidated financial statements, the calculation of certain figures shown in the financial statements requires that assumptions, estimates or assessments be made, particularly in relation to the calculation of provisions and impairment testing. These assumptions, estimates or assessments are prepared on the basis of the information available and the position at the balance sheet date.

Actual events occurring after the balance sheet date may prove to be different from the assumptions, estimates or assessments used.

Use of management estimates in the application of the **Group's accounting standards**

Carbone Lorraine may make estimates and use assumptions affecting the carrying amount of assets and liabilities, income and expense, as well as information about underlying assets and liabilities. Future results are liable to diverge significantly from these estimates.

The estimates and underlying assumptions are made based on past experience and other factors considered to be reasonable based on circumstances. They serve as the basis for the judgment exercised to determine the carrying amount of assets and liabilities, which cannot be obtained directly from other sources. Actual values may differ from the estimated values.

The estimates and underlying assumptions are reviewed continuously. The impact of changes in accounting estimates is recognized during the period of the change if it affects only this period or during the period of the change and subsequent periods, if the latter are also affected by the change.

- Notes 2/F1, 2/I and 5 concern testing goodwill and other noncurrent assets for impairment. The Group's management carried out this testing based on the most reliable expectations of future business trends at the relevant units taking discount rates into account.
- Notes 11 and 12 concerning provisions and employee benefits describe the provisions set aside by Carbone Lorraine. To determine these provisions, Carbone Lorraine used the most reliable estimate of these obligations.
- Note 20 concerning tax expense reflects the Group's tax position, which is based for France, Germany and the US on the Group's best estimate of trends in its future taxable income.

All these estimates are predicated on a structured collection process for projections of future cash flows, providing for validation by line managers, as well as on expectations for market data based on external indicators and used in line with consistent and documented methods.

X - New standards and interpretations not yet applied

New standards and amendments to standards and interpretations are due to enter force for fiscal years ended on December 31, 2007 and have not yet been applied in the preparation of the summary interim consolidated financial statements:

• IFRS 7 on Financial instruments: disclosures and the amended IAS 1 on Presentation of financial statements: disclosures require the disclosure of more extensive information about the importance of financial instruments for an entity's financial situation and performance and qualitative and quantitative details about the type of scale of the risks. IFRS 1 and amended IAS 7, application of which will be mandatory in the Group's financial statements at December 31, 2007, will entail more detailed disclosures about the Group's financial instruments and share capital.

Business combinations Note 3

Business combinations during fiscal 2007

On January 26, 2007, Ferraz Shawmut SA acquired a majority shareholding of 51.2% in the capital of Lenoir Elec. The acquisition of minority interests is covered by a purchase commitment recognized at €5.4 million under borrowings in the Group's consolidated financial statements. An equivalent amount to this debt is recognized under goodwill.

This deal fits perfectly with the policy of accelerating the pace of Carbone Lorraine's growth through development of the Electrical Protection segment's activities.

The value of goodwill recognized is predicated on Lenoir Elec's unique expertise in contactors (used to control power flow in high power circuits), protection control cabinets for the same circuits and electrical insulators. The tight fit between the products marketed by Ferraz Shawmut (fuses, power-isolating switches, etc.) and by Lenoir Elec, as well as the similarities between their customers and markets will give rise to substantial revenue enhancement synergies. Combining the two product ranges will also extend Carbone Lorraine's offering, as well as making it possible to supply complete systems alongside its current range of components.

The net assets acquired in these transactions and related goodwill are presented below:

In millions of euros	Net assets at acquisition date	Fair value adjustments	Fair value of net assets
Non-current assets	0.1		0.1
Other assets	4.2		4.2
Non-current liabilities	(0.1)		(0.1)
Current liabilities	(1.6)	(0.0)	(1.6)
Net assets	2.6	(0.0)	2.6
Goodwill			6.8
Total acquisitions			9.4
including:			
Acquisition price paid in cash			4.1
Borrowings			5.3

The fair value adjustment related to the recognition of employee benefits.

The contribution made to Carbone Lorraine's net income by this acquisition amounted to €0.7 million. The impact of this acquisition is an increase in the Group's net cash of €1.2 million.

Note 4 Goodwill

In millions of euros	June 30, 2007	Dec. 31, 2006	June 30, 2006
Net value at Jan. 1	176.7	182.1	182.1
Acquisitions	6.8	7.6	4.7
Changes in the scope of consolidation	3.6		
Translation adjustments	(2.2)	(13.0)	(9.2)
Net value at end of period	184.9	176.7	177.6
Gross value at end of period	184.9	176.7	177.6
Total impairment losses at end of period	0.0	0.0	0.0

A breakdown by cash-generating unit is shown in the following table:

In millions of euros	Dec. 31, 2006	Movements during the first half of 2007			June 30, 2007
	Net value	Acquisitions	Changes in the scope of consolidation	Cumulative translation adjustment	Net value
Anticorrosion equipment	61.5			(1.2)	60.3
High-temperature applications and high-energy braking	28.4			(0.3)	28.1
Electrical Applications	29.6		3.6	0.1	33.3
Electrical Protection	57.2	6.8		(0.8)	63.2
TOTAL	176.7	6.8	3.6	(2.2)	184.9

The change in the scope of consolidation represents the addition of India to the scope of consolidation.

Asset impairment tests Note 5

Impairment tests were conducted for each of the cash-generating units when the balance sheet at December 31, 2006 was prepared.

Under IAS 36, tests were carried out on the basis of the value in use determined using the discounted cash flow method.

The key assumptions used were as follows:

- five-year cash flow forecasts based on the 2007 budget and projections for the following four fiscal years;
- a discount rate after tax of 8% (rate equivalent to pre-tax rate);
- a perpetual growth rate of 1% for calculating terminal value;
- a normalized tax rate of 34%.

No impairment was identified during the tests.

The interim earnings reported by the Group do not call into question the assumptions adopted at the end of fiscal 2006 and no evidence of impairment was identified.

Note 6 Property, plant and equipment

In millions of ourse	land	Duildings	Plant, equipment	Other	Total
In millions of euros	Land	Buildings	and other	items	Total
Net value at December 31, 2005	30.5	23.9	70.7	14.3	139.4

Note 7 Investments

In millions of euros	June 30, 2007	Dec. 31, 2006	June 30, 2006
At year end, the unconsolidated shareholdings held by consolidated companies had a gross value of:	36.7	41.1	40.4
Less impairment losses amounting to:	(16.4)	(12.8)	(12.8)
representing a net value of:	20.3	28.3	27.6
Investments in other companies	-	-	-
TOTAL	20.3	28.3	27.6

The reduction in investments primarily reflects the addition of subsidiaries in India to the scope of consolidation.

The impairment losses recognized on investments at June 30, 2007 primarily related to CL Mauritius, Turkey, Argentina, Mexico and Singapore.

The main investments in unconsolidated subsidiaries and associates are as follows:

In millions of euros			
Company name	% held	Gross value	Net value
CL Mauritius	100	17.0	13.4
Carbone Lorraine Sanayi Urünleri A.S (Turkey)	100	5.0	1.0
Carbone Lorraine Argentina SA (Argentina)	100	3.7	0.8
Carbono Lorena de Mexico S.A.	100	2.2	0.6
Fusetech	50	1.3	1.3
Carbone Lorraine Holding (Singapore)	100	1.1	0.1
Nortroll (Norway)	34	0.8	0.5
Clisa (Mexico)	100	0.7	0.7
Carbone Lorraine Greece	100	0.6	0.6
Ferraz Electric Protection Hinode (China)	82	0.5	0.5
Carbone-Lorraine Chile (Chile)	100	0.2	0.2
GMI Metaullics (US)	25	0.2	0.2
Carbone Lorraine de Colombia S.A.	80	0.1	0.1
Le Carbone Materials KK	49	0.1	0.1
Investments in other companies		3.2	0.2
TOTAL		36.7	20.3

Total sales and total net income for these companies based on their as yet unaudited individual financial statements came to around \leqslant 16.2 million and \leqslant 0.9 million respectively. Their impact on the consolidated financial statements is not material. The consolidated sales of all these companies would amount to around \leqslant 6.0 million or 1.7% of total consolidated sales, after the elimination of intra-group flows.

The Chinese subsidiaries forming part of the Advanced Materials and Technologies division held by CL Mauritius specialized in high-temperature applications will be consolidated from December 31, 2007 with retroactive effect from January 1, 2007.

At June 30, 2007, net non-current assets were worth \leqslant 30.5 million and were financed by local debt and by a capital injection from the Group. Local net debt amounted to \leqslant 23.3 million and will appear on the Group's balance sheet at December 31, 2007.

Note 8 Inventories

In millions of euros	June 30, 2007	Dec. 31, 2006	June 30, 2006
Raw materials and other supplies	69.4	59.7	61.0
Work in progress	52.4	41.6	39.8
Finished goods	41.2	39.0	39.9
Carrying amount of inventories	163.0	140.3	140.7
Valuation allowances	(10.8)	(9.1)	(11.1)
Net Carrying Amount Of Inventories	152.2	131.2	129.6

Net inventories increased by \leq 21.0 million at June 30, 2007, including negative \leq 0.8 million attributable to currency effects

and \leqslant 5.0 million to additions to the scope of consolidation. On a like-for-like basis, inventories grew by 13% to \leqslant 16.8 million.

Note 9 Trade receivables

In millions of euros	June 30, 2007	Dec. 31, 2006	June 30, 2006
Gross trade receivables	149.9	131.4	137.8
Valuation allowances	(7.7)	(8.9)	(6.8)
Net trade receivables	142.2	122.5	131.0

Net trade receivables increased by €19.7 million at June 30, 2007, including negative €0.4 million attributable to currency effects

and €4.8 million to additions to the scope of consolidation. On a like-for-like basis, trades grew by 12.5% to €15.3 million.

Note 10 Share capital

In number of shares (unless stated otherwise)	Ordinary shares
Number of shares at January 1, 2007	13,965,475
Issue of new shares (in millions of euros)	0.4
Number of shares at June 30, 2007	14,152,580
Number of shares in issue and fully paid-up	187,105
Number of shares in issue and not fully paid-up	0
Par value of shares (€)	2.00
Entity's shares held by itself or by its subsidiaries and associates	27,924

The issue of shares carried out in 2007 derived from the exercise of stock options granted to employees (187,105 shares).

The number of voting rights stood at 14,124,656 after deducting the 27,924 treasury shares held by the Company at June 30, 2007.

No shares carry double voting rights.

The number of stock options granted to company officers and employees and still outstanding stood at 273,675, taking into account the canceled options.

The number of bonus share options granted to company officers and employees yet to be exercised stands at 48,376.

Note 11 Provisions and contingent liabilities

In millions of euros	June 30,	June 30, 2007		December 31, 2006		June 30, 2006	
	Non-current	Current	Non-current	Current	Non-current	Current	
- provision for restructuring	0.1	2.7	0.1	0.1	0.1	0.7	
- provision for litigation	45.4	0.4	45.3	0.1	46.0	0.5	
- other provisions	0.8	0.3	0.0	0.3	0.7	0.5	
TOTAL	46.3	3.4	45.4	0.5	46.8	1.7	

Current and non-current	Dec. 31, 2006	Additions	Uses	Other	Cumulative translation adjustment	
- provision for restructuring	0.2	1.1	(1.1)	2.6		2.8
- provision for litigation	45.4		(0.2)	0.7	(0.1)	45.8
- other provisions	0.3		(0.2)	1.0		1.1
TOTAL	45.9	1.1	(1.5)	4.3	(0.1)	49.7

At June 30, 2007, provisions for litigation primarily covered the entire amount of the fine handed down to the Group by the European authorities (€43 million) and class-action lawsuits in the US (€2.3 million reclassified under non-current provisions at December 31, 2006). A settlement of these class-action lawsuits amounting to USD6 million was agreed in August 2004. This settlement was reduced to USD3.7 million in May 2006, of which USD3 million was paid in 2005 and USD0.7 million during the second half of 2006. This reduction followed specific

proceedings launched by certain auto equipment manufacturers, who withdrew from the Federal class-action lawsuit and lodged a specific claim for damages. The Group believes that there is no legal basis for this separate legal action. As a result, it has not changed the provision from the initial amount that was based on the settlement agreement of August 2004.

No material contingent liabilities were identified at June 30, 2007.

Note 12 Employee benefits

The Carbone Lorraine group's principal pension plans are defined benefit plans and are located in the UK (29% of obligations), the US (24% of obligations), France (19% of obligations) and Germany (15% of obligations).

The Group's obligations were measured at December 31, 2006 with the assistance of independent actuaries in accordance with IAS 19. The charge during June 30, 2007 was calculated by extrapolating on the assessment at December 31, 2006.

The rates used for the principal countries are summarized below:

2006	Discount rate	Return on plan assets	Average rate of salary increases	Inflation rate
France	4.5%	4.25%	2.0%	2.0%
Germany	4.5%	Not applicable	2.5%	2.0%
US	6.0%	6.75%	Not applicable	Not applicable
UK	5.0%	6.75%	3.3%	2.8%

Reconciliation between assets and liabilities recognized:

	June 30, 2007	December 31, 2006	June 30, 2006
Actuarial obligation	104.5	100.3	100.8
Fair value of plan assets	(59.4)	(56.4)	(50.7)
Unrecognized actuarial gains and losses	(2.4)	(2.5)	(4.3)
Unrecognized past service cost (rights not vested)	0.5	0.4	0.3
Net amount recognized	43.2	41.8	46.1

Breakdown of the Group's obligations at June 30, 2007 by geographical area:

	France	Germany	US	UK	Rest of the world	Total at June 30, 2007
Actuarial obligation	19.4	15.9	25.5	30.0	13.7	104.5
Fair value of plan assets	(4.2)	-	(17.9)	(29.3)	(8.0)	(59.4)
Unrecognized actuarial gains and losses	(1.5)	(1.0)	(0.8)	2.3	(1.4)	(2.4)
Unrecognized past service cost (rights not vested)	0.5	-	-	-	-	0.5
Net amount recognized	14.2	14.9	6.8	3.0	4.3	43.2

$\label{thm:movements} \mbox{Movements in the Group's obligations:}$

Dividends paid	12.2	10.6	10.2
Interest payments	5.2	9.5	4.0
Translation adjustments and other	(2.1)	(8.5)	(2.2)
Other	7.5	-	-
DEBT AT YEAR-END	182.6	154.3	175.7

Total consolidated net debt amounted at June 30, 2007 at €182.6 million, compared with €154.3 million at December 31, 2006 and €175.7 million at June 30, 2006.

The €28.3 million increase in debt was primarily attributable to the €12.2 million in dividend payments, the recognition under "Other changes" of a €5.3 million liability to minority shareholders in Lenoir Elec and a reduction in cash of €12.7 million generated by operating and investing activities, compared with €19 million in the six months to June 30, 2006.

Confirmed credit lines at June 30, 2007

Carbone Lorraine has two major financing agreements.

A USD85 million private placement negotiated in May 2003 with US investors, comprising one USD65 million tranche with a final maturity of 10 years, which was repaid in part during May 2007, and one USD20 million tranche with a final maturity of 12 years. The average duration of the private placement was initially around eight years because it is repayable in installments. Interest is paid at a fixed rate to investors, but the interest-rate swaps negotiated at the outset mean that Carbone Lorraine pays a floating US dollar rate plus a credit margin.

A USD220 million loan arranged in December 2004 with a maturity of five years was syndicated to an international pool of banks. The interest rates on the syndicated loan are the interbank rate for the relevant currency when drawings are made plus a fixed credit margin.

In millions of US dollars	Interest rate	Amount	Drawn down at June 30, 2007	Maturity date
SYNDICATED LOAN	FLOATING	220	109	DEC. 31, 2009
US PRIVATE PLACEMENTS, TRANCHE A	FIXED	55.7	55.7	MAY 2013
- including		9.3	9.3	May 2008
		9.3	9.3	May 2009
		9.3	9.3	May 2010
		9.3	9.3	May 2011
		9.3	9.3	May 2012
		9.3	9.3	May 2013
US PRIVATE PLACEMENTS, TRANCHE B	FIXED	20	20	MAY 2015
- including		4.0	4.0	May 2011
		4.0	4.0	May 2012
		4.0	4.0	May 2013
		4.0	4.0	May 2014
		4.0	4.0	May 2015
TOTAL		295.7	184.7	

Financial covenants at June 30, 2007

In connection with its various confirmed borrowings, Carbone Lorraine has to comply with a number of obligations, which are customary with this type of lending arrangement. Should it fail to comply with some of these obligations, the banks or investors (for the US private placements) may oblige Carbone Lorraine to repay the relevant borrowings ahead of schedule. Under the cross-default clauses, early repayment of one significant borrowing may oblige the Group to repay other borrowings immediately.

Carbone Lorraine must comply with the following financial covenants at June 30 and December 31 each year:

In millions of euros			
			EBITDA/net interest
Financial covenants (consolidated financial statements)	Net debt/EBITDA	Net debt/equity	expense
Covenants*	The ratio must be:	The ratio must be:	The ratio must be:
- US private placement	< 3.35x	< 1.3x	→ 3x
- syndicated loan	-	< 1.3x	<u> </u>
Actual ratios			
June 30, 2007			
- US private placement	1.86x	0.57x	9.63x
- syndicated loan		0.58x	
December 31, 2006			
- US private placement	1.74x	0.50x	9.37x
- syndicated loan	-	0.51x	-

Method for calculating covenants: in line with the accounting rules, the net debt shown in the financial statements uses closing rates to calculate the euro-equivalent value of debt denominated in foreign currencies. For the purposes of the covenants, net debt does not take into account short-term financial receivables. In addition, solely for the calculation of the net debt/EBITDA ratio, net debt has to be recalculated at the average €/USD exchange rate for the period in the event of a difference of over 5% between the average exchange rate and the closing rate. To calculate the covenants at June 30, the convention is for EBITDA or gross operating income to be deemed to be EBITDA reported for the first six months of the year multiplied by two. In view of the first-time adoption of IFRS, EBITDA and net debt were recalculated on a pro forma basis under French GAAP for the purpose of the covenants.

At June 30, 2007, there were no material borrowings or liabilities secured by assets or guaranteed by third parties.

Breakdown of borrowings, including the current portion at June 30, 2007

Operating receivables and payables all mature in less than one year. A breakdown of borrowings by maturity is shown below.

In millions of euros	Total	< 1 year	→ 1 and < 5 years	> 5 years
Borrowings in USD	82.3	6.9	59.7	15.7
Borrowings in euros	61.1		61.1	
Borrowings in GBP	8.2		8.2	
TOTAL	151.6	6.9	129.0	15.7
Amortization of issuance costs at the EIR	(0.9)			
Fair value of interest-rate derivatives	(3.0)			
TOTAL	147.7			

Of the €129.0 million in debt due to mature in between one and five years' time, €19.7 million had a maturity of over three years at June 30, 2007.

Analysis of total net debt at June 30, 2007

By currency	%	By interest rate	%
Euros	43	Fixed	45
USD	53	Floating	55
Other	4		

The Group's policy for managing interest rate risk consists solely in taking limited positions from time to time depending on trends in borrowing rates.

In May 2003, the Group purchased several interest-rate swaps covering an aggregate nominal amount of USD85 million to turn the interest payable on the private placements into a floating rate. Under the terms of these swaps, the Company receives the interest payable to investors and pays 3-month USD Libor plus a credit margin. The starting date of the swap was May 28, 2003, and the swap has the same duration as the private placement.

In October 2005, the Group purchased several interest-rate swaps covering an aggregate nominal amount of USD50 million. These swaps, which have a duration of three years, became effective in May 2006. Under the terms of these swaps, Carbone Lorraine pays a fixed interest rate of 4.6325% and receives 3-month USD Libor.

In October 2006, the Group purchased interest-rate swaps covering an aggregate nominal amount of \leq 45 million. These swaps, which have a duration of 15 months, became effective in October 2006. Under the terms of these swaps, Carbone Lorraine pays a fixed interest rate of 3.6575% and receives 1-month Euribor.

All the Group's interest rate hedging activities are carried out by the parent company (Le Carbone Lorraine SA).

In millions of euros	Total	Maturity < 5 years	Maturity > 5 years
Floating rate debt*	151.6	135.9	15.7
Financial assets	31.0	31.0	
Net position before hedging	182.6	166.9	15.7
Fixed-rate hedge	82.0	82.0	
Net position after hedging	100.6	84.9	15.7

^{*} After the fixed-for-floating rate swap on the US private placements and before amortization of issuance costs at the effective interest rate.

Assuming Carbone Lorraine's debt and exchange rates remain unchanged at their June 30, 2007 level and taking into account the swaps held in the portfolio, an increase of 100 basis points in floating interest rates would increase the Group's annual interest costs by around €1.0 million.

Note 14 Derivative financial instruments

In the normal course of its business activities, the Group is exposed to interest rate, currency and commodity price risks. Derivative financial instruments are used to hedge price fluctuations. The market values of the majority of the financial instruments held by the Group were estimated based on market rates at the end of the fiscal year. They were either calculated by the Group or obtained from the banking counterparties with which the financial transactions were conducted. These instruments match borrowings (interest rates) or sales transactions certain or almost certain (currency and raw materials) to occur.

In millions of euros	Valuation at June 30, 2007*	Nominal amount** June 30, 2007		Nominal amount** June 30, 2006
Interest rate instruments	(1.7)	138.1	147.5	106.2
Currency instruments	0.9	13.4	18.2	13.9
Commodity instruments	0.9	9.1	2.9	3.1

Including accrued interest (for interest rate instruments).

In accordance with IFRS 32 and 39, the fair value at June 30, 2007 is recognized on the balance sheet and/or income statement in the Group's consolidated financial statements.

Sum of net positions by foreign currency (for currency instruments).

Note 15 Other non-recurring income and expense

Other non-recurring income and expense break down as follows:

In millions of euros	June 30, 2007	Dec. 31, 2006	June 30, 2006
Restructuring costs	(2.0)	(0.9)	(0.3)
EU fine and US class-action lawsuits	(0.2)	(0.5)	(0.1)
Asset impairment		(2.8)	(1.0)
Prior period income/(losses) of companies consolidated for the first time	(2.2)		
Disposals of non-current assets	0.1		
Other	0.4	(0.9)	(0.2)
TOTAL	(3.9)	(5.1)	(1.6)

At June 30, 2007, non-recurring income and expense amounted to a net charge of \leq 3.9 million. The principal factors were:

- the closure of the Farmville production facility, leading to non-current asset transfer and other costs amounting to €2.0 million;
- the prior period losses of companies consolidated for the first time in an amount of €2.2 million:
 - negative €3.6 million deriving from the Chinese companies that will be consolidated at December 31, 2007. The losses are recognized as impairment in the value of the investment in the CL Mauritius parent company,
 - €1.4 million linked to the Indian companies joining the scope of consolidation for the first time at June 30, 2007;
- the capital loss of €0.8 million recorded on land and buildings in Germany;
- the €0.9 million gain on the disposal of the Airvault building.

In fiscal 2006, non-recurring income and expense amounted to a net charge of \in 5.1 million. The principal factors were:

- the closure of the Farmville manufacturing plant:
 - impairment losses of €1.8 million recognized on noncurrent assets,
 - non-current asset transfer costs and other costs amounting to €0.9 million;
- an outlay of €0.5 million in connection with the settlement of US class-action lawsuits;
- recognition of a €1.0 million impairment loss on land and buildings in Germany;
- the disposal of Astro Service Center's assets leading to a loss of $\in 0.6$ million.

The non-recurring income and expense recognized during the first half of fiscal 2006 amounted to a loss of €1.6 million. The principal factors were:

- the impairment loss of €1.0 million recognized on land and a building, which are no longer used in Germany;
- an additional €0.3 million in industrial restructuring costs.

TOTAL TAX EXPENSE	(9.0)	(11.0)	(7.5)

In France, Le Carbone Lorraine SA, Carbone Lorraine Applications Électriques, Carbone Lorraine Composants, Carbone Lorraine Equipements Génie Chimique, Carbone Lorraine Corporate Services, Ferraz Shawmut SA, Ugimag, Ferroxdure, Polygraphite, AVO and FDI are consolidated for tax purposes.

There are also:

- two consolidated tax groups in the US, one encompassing Carbone Lorraine North America and its subsidiaries and the other encompassing Ugimagnet, Ugimag Inc. and Ferraz Shawmut Inc;
- two consolidated tax groups in Germany;
- and a consolidated tax group in Japan encompassing Carbone KK and Ferraz Shawmut Japan.

The Group's effective tax rate stood at 32% or 29% disregarding the contribution made by companies consolidated for the first time. In the six-month period to June 30, 2006, the Group's effective tax rate came to 27%.

Analysis of income tax expense

In millions of euros	June 30, 2007
Net income	19.4
Income tax expense/(benefit) on continuing operations	(9.0)
TOTAL INCOME TAX EXPENSE/(BENEFIT)	(9.0)

Basic earnings per share (€)	1.34	2.92	1.45
Diluted earnings per share (€)	1.31	2.82	1.39

Note 22 Dividends

The dividend paid to shareholders in May 2007 in respect of fiscal 2006 came to \le 0.85 per share, representing an aggregate amount of \le 11.8 million.

A dividend of \le 0.70 per share was paid to shareholders in May 2006 in respect of fiscal 2005, representing an aggregate amount of \le 9.7 million.

Note 23 Leases

1 - Finance leases

Carrying amount by asset category:

In millions of euros	June 30, 2007	Dec. 31, 2006	June 30, 2006
Buildings	0.1	0.6	0.7

The investments financed comprise the leasing of manufacturing facilities at Poitiers and Airvault in France. The lease payments are fixed with a final maturity in July 2009.

2 - The Group is the lessee (operating lease)

Schedule of minimum payments

	Total at June 30,	Less than one year More than one year		More than five
In millions of euros	2007	ahead	ahead	years ahead
Minimum payments	14.0	3.2	10.8	3.5

Minimum payments represent the amount of certain future property lease payments up until the expiration of the lease prior to any renewals. The leases do not contain any clause restricting debt or on dividend payments. The largest lease

commitments relate to two facilities in the US and two others in France, representing an aggregate amount of \le 10.7 million.

Note 24 Relations between the parent company and its subsidiaries

Le Carbone Lorraine SA is a holding company that manages its investments in subsidiaries and affiliates and the Group's financing activities, and charges subsidiaries for services related to the intangible assets and property, plant and equipment that it owns. All transactions between the Group and its subsidiaries take place on an arm's length basis.

Le Carbone Lorraine SA belongs to the Carbone Lorraine group, which encompasses 90 consolidated and unconsolidated companies in 35 countries.

Transactions between the Group's consolidated companies are eliminated for consolidation purposes.

Relations with unconsolidated subsidiaries and associates

Group sales to unconsolidated subsidiaries and associates amounted to \leq 10.2 million in the first half of fiscal 2007, compared with \leq 8.2 million in the first half of fiscal 2006).

In the first half of fiscal 2007, the management and administrative fees charged to unconsolidated subsidiaries by the Group (deducted from administrative costs) amounted to $\[\in \]$ 0.1 million, down from $\[\in \]$ 0.2 million in the first half of fiscal 2006).

The amounts receivable by the Group from its unconsolidated subsidiaries and associates came to $\ensuremath{\in} 7.0$ million at June 30, 2007, while amounts payable came to $\ensuremath{\in} 0.4$ million.

Shareholders' advances made to unconsolidated subsidiaries and associates by Le Carbone Lorraine SA amounted to €0.1 million at June 30, 2007 (vs. €0.7 million in the first half of fiscal 2006).

2 - Disclosure of compensation paid to key management personnel (Executive Committee, including the Chairman and CEO)

In millions of euros	June 30, 2007	June 30, 2006
Salaries, bonuses, benefits in kind and directors' fees	0.8	0.8
Top-up pension plan payments(1)	0.2	0.3
Other long-term employee benefits	0.0	0.0
TOTAL	1.0	1.1

^[1] The members of the Executive Committee, including the Chairman and Chief Executive Officer qualify for top-up pension payments. At the Board of Directors' meeting on July 25, 2007, this regime was altered as follows:

Members of the Executive Committee do not qualify for any other long-term employee benefits.

Furthermore, Executive Committee members (including the Chairman and CEO) were awarded the following share-based payments:

- stock options: no stock subscription options were granted to members of the Executive Committee (including the Chairman and CEO) during fiscal 2004, 2005 and 2006;
- bonus share allotments: see the table of previous allotments to the Executive Committee (including the Chairman and CEO) below.

	2005 plan Tranche 1
Date of Board of Directors' meeting	June 30, 2005
Total number of shares allotted	15,300
Share price at allotment date	39.25
Definitive allotment date (end of the vesting period)	July 1, 2007
End of lock-up period	July 1, 2009

No bonus shares were granted to Executive Committee members in the 2006 plan.

Note 25 Commitments and contingencies

A - Financial commitments and liabilities

In millions of euros	June 30, 2007	Dec. 31, 2006	June 30, 2006
Commitments received			
Guarantees and endorsements	0.3	0.4	0.6
Other commitments received	0.0	0.0	1.7
TOTAL	0.3	0.4	2.3
Commitments given			
Collateralized debts and commitments	0.3	0.1	0.1
Market guarantees and endorsements	9.9	11.5	8.1
Payment guarantees on acquisition	-	-	-
Other guarantees	62.1	64.3	45.6
Other commitments given	0.8	0.2	0.1
TOTAL	73.1	76.1	53.9

The above table summarizes the Group's commitments and contingencies.

Provided that the relevant person is still employed by the Group upon their retirement, this regime guarantees pension income of 20% of the basic reference salary during the final three years prior to retirement plus a flat-rate of 50% of the maximum bonus.

The actuarial obligation was assessed at June 30, 2007 at €1.4 million (€1.4 million at December 31, 2006).

Nature

The largest item totaling €62.1 million relates to other guarantees, which include a €24.5 million guarantee (initially €43 million) given to the European Commission as a result of the fine handed down by the European Commission in respect of which the Group has currently lodged an appeal before the European Communities Court of First Instance. This guarantee has enabled the Group to postpone payment of the fine for the duration of the appeal procedure. This line item also includes a guarantee of €16 million covering the maximum daily drawings by subsidiaries under the European cash pooling arrangements and a guarantee of USD25 million linked to business activities in Asia.

Maturity

Commitments and contingencies with a maturity of over 1 year amounted to €32.5 million. They include the €16 million linked to the cash pooling system and guarantees linked to investments in Asia, which amount to USD16 million and are due to expire in July 2009. Market guarantees generally last for less than one year, except for a few market guarantees, the duration of which does not exceed three years. The €24.5 million guarantee given to the European Commission expires in December 2007. It may be extended with the consent of the guarantor banks depending on the date of the Court's ruling.

Internal control

Under the Group's internal control organization, Group companies are not authorized to enter into transactions giving rise to commitments and contingencies without obtaining the prior approval of the Group's Finance department and, where appropriate, of the Chairman and Chief Executive Officer or the Board of Directors. Nonetheless, certain Group companies have the option of issuing market guarantees not exceeding €150,000 with a maturity of less than two years without prior authorization in the normal course of their business activities. These guarantees are listed in the documents completed by the companies as part of the account consolidation procedure.

As far as the Company is aware, no material commitments or contingencies under the accounting standards in force have been omitted.

B - Title retention clause

None.

C - Individual Right to Training

In France, employees have an individual right to training. No provisions are set aside to cover these rights because the Group does not have the requisite information to assess them reliably.

Note 26 Subsequent events

None.

Note 27 Approval of the financial statements

The Group's consolidated financial statements for the six months ended June 30, 2007 were approved by the Board of Directors at its meeting on September 11, 2007.

Statutory auditors' review report on the half year Condensed consolidated financial statements

As statutory auditors and as required by article L. 232-7 of the French Companies Act (Code de commerce), we have:

- reviewed the accompanying half year condensed consolidated financial statements of Le Carbone Lorraine, covering the period from January 1st to June 30th, 2007 and,
- verified the information contained in the half year management report.

The half year condensed consolidated financial statements are the responsibility of your Board of Directors. Our responsibility is to issue a report on these financial statements based on our review.

We conducted our review in accordance with professional standards applicable in France. Those standards require that we perform limited procedures, to obtain an assurance, which is less than obtained in an audit, as to whether the half year consolidated condensed financial statements are free of material.

misstatement. We have not performed an audit as a review is limited primarily to analytical procedures and to inquiries of group management and knowledgeable personnel on information that we deemed necessary.

Based on our review, nothing has come to our attention that causes us to believe that the half-year condensed consolidated financial statements are not prepared, in all material respects and as described in the notes, in accordance with IAS 34, a standard of the IFRS framework such as adopted by the European Union and related to interim financial statements.

We have also verified, in accordance with professional standards applicable in France, the information contained in the half year management report supplementing the half year consolidated condensed financial statements submitted to our review.

We have no comment to make as to the consistency with the half year consolidated condensed financial statements and the fairness of the information contained in the half year management report.

This is a free translation of the original French text for information purposes only.
