

MERSEN'S EXPERTISE TO SERVE A NEW GENERATION OF REVOLUTIONARY SCANNERS

PARIS, 23 FEBRUARY 2016 - Mersen (Euronext FR0000039620 – MRN), global expert in electrical specialties and advanced materials, announces the signature of a €1.9 million order for the supply of laser mirrors for a new generation of revolutionary scanners.

The order illustrates Mersen's ability to innovate and cooperate with all sectors of industry. Mersen's close partnership with manufacturers has resulted in the design of a lighter and exceptionally accurate scan mechanism using silicon carbide.

These images are crucial for the supervision and documentation of a vast variety of high-precision environments.

Silicon carbide is an exceptionally light material with unique mechanical properties and unrivalled rigidity and lightness. It provides exceptional thermal mechanical stability that no other material can match. These properties allow also Mersen to market silicon carbide components in a number of sectors, such as aerospace, pharmaceuticals and equipment for the semiconductor industry.

ABOUT MERSEN

Global expert in electrical power and advanced materials, Mersen designs innovative solutions to address its clients' specific needs to enable them to optimize their manufacturing performance in sectors such as energy, transportation, electronics, chemicals, pharmaceuticals and process industries.

Mersen, with its 6,400 employees working across 35 countries, recorded sales of 777 million euros in 2015.

THE GROUP IS LISTED ON EURONEXT PARIS – COMPARTMENT B
