

SAFE AT MINUS 40°C

NH FUSE SWITCH
DISCONNECTOR

MULTIBLOC®
AND MULTIVERT®

Mersen switchgear ranges **MULTIVERT®** and **MULTIBLOC®** are designed and tested to operate at extremely low temperatures down to **-40°C ambient temperature:**

- Use of low-temperatures proof plastic materials
- Mechanical tests for safe operation at -40°C

Temperatures below minus 20°C are a challenge for plastic and metal parts. Mersen switchgear devices ensures proper functionality even in these harsh conditions, providing protection for human beings and electrical appliances.

MULTIBLOC® and MULTIVERT® product ranges ensure safe operation at temperatures down to minus 40°C
